Overview of this information collection:

1. *Type of Information Collection:* Extension of a currently approved collection.
2. *The Title of the Form/Collection:* Law Enforcement Officers Killed or Assaulted (LEOKA)
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form Number: LEOKA Form 1-705.

The applicable component within the Department of Justice is the Criminal Justice Information Services Division, Federal Bureau of Investigation, Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*
City, county, state, tribal, territory and federal law enforcement agencies. Abstract:
Under Title 28, U.S. Code 534, Acquisition, Preservation, and Exchange of Identification Records; Appointments of Officials, 1930, this collection requests Law Enforcement

Officers Killed or Assaulted data from city, county, state, federal, and tribal law enforcement agencies in order for the FBI's UCR Program to serve as the national clearinghouse for the collection and dissemination of crime data and to publish these statistics in the Law Enforcement Officers Killed or Assaulted (LEOKA) annual publication.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* There are approximately 18,600 law enforcement agencies within the universe of potential respondents. Due to the recent National Incident-Based Reporting System (NIBRS) transition, the FBI's UCR Program is no longer accepting new monthly submissions for LEOKA data using this clearance but will accept updates to Summary Reporting System submissions for incidents occurring prior to 2021. The submission of updates to past data is strictly voluntary and at the discretion of the contributing agency. Based on current reporting patterns, the FBI's UCR Program has received 64,734 LEOKA update submissions since January 1, 2021, with an estimated response time of 7 minutes per response on this form. As more agencies transition to NIBRS, it is expected that the total number of updates will steadily decline, mainly due to updates being submitted through NIBRS on a more frequent basis. However, due to the need for these updates, the burden hour estimate is based on the most recent submission volumes to achieve the highest possible burden estimate.
6. *An estimate of the total public burden (in hours) associated with the collection:* There are approximately 7,552.3 hours, annual burden, associated with this information collection.
